NOW IS YOUR CHANCE FOR SMS TRAINING.

This is the internationally known **MITRE SMS Overview class** with twice the class time and a workshop approach with "real-life" exercises. MITRE SMS courseware has been taught to people from 43 countries making it internationally accepted and desired. This class contains basic knowledge in FAA and ICAO SMS requirements and standards with exercises after each module for hands-on experience.

Content is appropriate for all aviation entities and includes: ICAO SMS Standards • FAASMS Standards • Human Factors and Safety Culture • SMS Requirements • Hazard Identification Methods • Safety Assurance Overview • Phased SMS Implementation Overview • Safety Risk Management • 1/2 day Workshop with Proactive Hazard Identification, Root Cause Analysis Techniques, and Risk Mitigation • Group Discussions

Who Should Attend: Parts 91, 121, 125, 135, 139, 141, 145, ATC, insurers, etc... All individuals assigned to safety and safety-related positions to include airlines, charter operators, corporate flight departments, flight schools, manufacturers, maintenance repair and overhaul facilities, aviation support companies, airports, aviation insurers, and government regulatory entities; and those with no knowledge of, or who are new to safety management (including CEOs, line personnel, safety managers, risk mitigation team, experts). Class attendance is limited.
